Powering Snowmaking—Over 35 Years

Our objective is to provide high quality pumps, compressors, replacement parts and technical expertise to keep your operations running at peak efficiency. Since the 1970's we have supplied a variety of prefabricated pump stations to the ski industry worldwide, and possess more expertise and experience than most suppliers combined. Our strong commitment to customer service combined with our superior products and technical engineering make us the ski industry leader.

Capabilities

- Vertical turbine and multistage centrifugal pumps for high pressure snowmaking service
- Prefabricated pump stations including installation and startup
- Variable speed pumping systems
- Air compressor rebuilds to manufacturers' specifications, using premium parts with new equipment warranties, at a substantial savings
- Genuine OEM parts for all major pump and compressor manufacturers
- Pump upgrade and evaluation programs
- Complete pump rebuild capabilities; including impeller trimming / balancing, pump rebuilding to manufacturers' specifications, machine work, special coatings / castings and precision laser shaft alignments
- Factory tolerance overhauls and rebuilds
- Vibration analysis
- Wire-to-water pump system testing

Added Value

- 24-hour service capability
- Certified factory trained technicians
- Performance guaranteed startup and training
- Expert equipment selection and application
- Premium efficiency products and accessories
- ISO certified manufacturers

Industry Leader

TDM is recognized as an industry leader, specializing in high pressure snowmaking pumps & compressors. Ski area operators around the globe rely on us for our extensive experience and world class expertise.
